

# The quiet little chair with BIG features

## Opus 1 Musicians' Posture Chair

The ultimate in musician supportive seating, the Opus 1 musicians' posture chair has an enviable world-wide reputation for encouraging correct posture for all users. Many have attempted to mimic the Opus chair, but none have matched it.

The unique shape of the chair's backrest and seat support the spine in the thoracic, lumbar and pelvic regions, preventing backward rotation of the pelvis under pressure – the most common cause of back pain. This chair has been highly recommended by Alexander Technique and ergonomic specialists.

### Specifications

Seat height:	450mm, 470mm or 490mm
Seat depth:	460mm
Overall width:	480mm
Frame:	19mm steel
Weight:	6 kg

Fully stackable for ease of storage on the Opus storage/transportation trolley and available with specially designed linking options to facilitate layouts where required. All chairs within the Opus posture chair range have additional features such as an extensive upholstery colour range, 2 choices of frame colour and variable seat height options (e.g. harpists generally prefer a lower seat).

## Opus 3 Musicians' Posture Chair

The Opus 3 musicians' posture chair offers equal ergonomic brilliance to the Opus 1, using the same bespoke internal back panel to provide comprehensive spinal support and waterfall seat front to reduce pressure on the thighs and back of legs. However, a more conservative approach to other design elements has permitted a superb alternative posture chair at a slightly lower price than the Opus 1.

### Specifications

Seat frame height:	450mm, 470mm or 490mm
Seat depth:	400mm
Overall width:	400mm
Frame:	19mm
Weight:	6kg

Like the Opus 1, the Opus 3 is fully stackable for ease of storage on the Opus storage/transportation trolley and is available with specially designed linking options to facilitate layouts where required. All chairs within the Opus posture chair range have additional features such as an extensive upholstery colour range, 2 choices of frame colour and variable seat height options.
